# Rules on letting this property

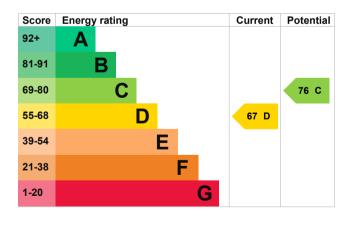

Properties can be let if they have an energy rating from A to E.

You can read guidance for landlords on the regulations and exemptions (<u>https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance</u>).

## **Energy rating and score**

This property's current energy rating is D. It has the potential to be C.

<u>See how to improve this property's energy</u> <u>efficiency</u>.

The graph shows this property's current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

the average energy rating is D the average energy score is 60

# Breakdown of property's energy performance

## Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

| Feature              | Description                                 | Rating  |
|----------------------|---|---------|
| Wall                 | Cavity wall, as built, insulated (assumed)  | Good    |
| Roof                 | Pitched, 150 mm loft insulation             | Good    |
| Window               | Fully double glazed                         | Average |
| Main heating         | Electric storage heaters                    | Average |
| Main heating control | Manual charge control                       | Poor    |
| Hot water            | Electric immersion, off-peak                | Average |
| Lighting             | Low energy lighting in 14% of fixed outlets | Poor    |
| Floor                | (another dwelling below)                    | N/A     |
| Secondary heating    | Portable electric heaters (assumed)         | N/A     |

### Primary energy use

The primary energy use for this property per year is 434 kilowatt hours per square metre (kWh/m2).

## How this affects your energy bills

An average household would need to spend **£723 per year on heating, hot water and lighting** in this property. These costs usually make up the majority of your energy bills.

You could **save £205 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2021** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

## Heating this property

Estimated energy needed in this property is:

- 4,135 kWh per year for heating
- 1,764 kWh per year for hot water

This property produces

3.3 tonnes of CO2

# Impact on the environment

| This property's current environmental impact rating is E. It has the potential to be D.  |                 | This property's potential production   | 2.5 tonnes of CO2 |
|--|-----------------|--|-------------------|
| Properties get a rating from A (best) to G (worst)<br>on how much carbon dioxide (CO2) they<br>produce each year. CO2 harms the environment. |                 | You could improve this property's CO2<br>emissions by making the suggested changes.<br>This will help to protect the environment.                          |                   |
| Carbon emissions   |                 |  | environment.      |
| An average household<br>produces   | 6 tonnes of CO2 | These ratings are based on assumptions about<br>average occupancy and energy use. People<br>living at the property may use different amounts<br>of energy. |                   |

## Changes you could make

| Step   | Typical installation cost | Typical yearly saving |
|--|---------------------------|-----------------------|
| 1. Increase loft insulation to 270 mm                | £100 - £350               | £40                   |
| 2. Add additional 80 mm jacket to hot water cylinder | £15 - £30                 | £14                   |
| 3. Low energy lighting                               | £30                       | £29                   |
| 4. High heat retention storage heaters               | £1,200 - £1,800           | £100                  |
| 5. Heat recovery system for mixer showers            | £585 - £725               | £23                   |

## Help paying for energy improvements

You might be able to get a grant from the <u>Boiler Upgrade Scheme (https://www.gov.uk/apply-boiler-upgrade-scheme)</u>. This will help you buy a more efficient, low carbon heating system for this property.
